Robert,

I was wondering if your office has access to the blood lead data that the state public health offices use.

Tom Huetteman, Assistant Director

Land Division, USEPA Region 9

State disregards medical data in lead cleanup plan near Exide plant

Los Angeles Times | March 26, 2016 | 8:15 AM

The state of California has blood test results showing high levels of lead in children living near the closed Exide battery plant in Vernon but is not using the information to direct its massive cleanup of lead-contaminated homes and yards.

Health experts say the test results should be used to help pinpoint neighborhoods most in need of swift cleanup because children there have been exposed to more of the poisonous metal, which spewed for decades from the Exide Technologies recycling facility.
